FS-PORTAL

Folding sliding door
hardware that offers clear
and unobstructed openings

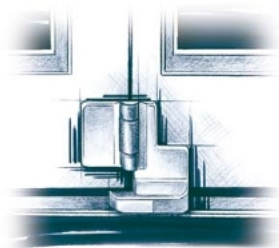

Advantages at a glance

- ▶ Opening width of up to 6.3m
- ▶ Ball-bearing raced roller gives smooth operation
- ▶ Thermally broken threshold for low threshold design meeting DIN 18030

Light, air and space - exactly as you would like it

The new FS-PORTAL folding sliding door hardware from SIEGENIA-AUBI allows you to move the folding door to the side safely and easily, maximising the opening and allowing easy access to the outdoors. Using up to 7 sashes, you can create an opening of up to 6.3 meters. FS-PORTAL hardware is suitable for timber, pvc or aluminium profiles.

Safe cleaning

Folding-sliding doors are ideal for balconied rooms, and thanks to the new SIEGENIA-AUBI FS-RS* sash hinge, the outside of the folding sash can be easily cleaned from the inside, whilst the sash stays in a secure position.
